

Dealin' Digits Math Games

Dear Families,

Playing games is a great way to reinforce what your child is learning in the classroom. Not only are they fun, but games offer meaningful practice in engaging and motivating ways. So starting next week, I'll be sending your child home with games to play as a part of their homework. As you play these games, you'll be helping your child:

- ★ reinforce basic skills
- ★ think strategically
- ★ develop mental math skills
- ★ communicate mathematically
- ★ build confidence

Along with the games will be a **Dealin' Dialogue** slip that will list the game and version I'd like you to play. The slip will also give you an opportunity to share thoughts about your experience playing the game. These thoughts are important to me as we work together to help your child develop a strong foundation in mathematics.

I encourage you to play the games together as often as you can. Playing often will help reinforce important skills and help your child become a confident math learner.

As always, please do not hesitate to contact me with any questions you may have.

Thank you for your support!
